Discover the creative possibilities that can be achieved when you start with a foundation of grid lines. By laying down a grid you now know where to place, position, and scale all the elements of the design. In this hands on class you will learn how to stitch out 20 intricate grid based designs. Create incredible texture in blocks, borders or as background fills. Rulers, stencils, marking tools will all be used and discussed. Come away with renewed confidence in your abilities to quilt a masterpiece.
