

Supply List for Floating Forest

Taught by Rita Lynne

Scissors: fabric and paper, rotary cutter any size, Small cutting mat. I will have some mats available also.

Paper and pen for notes. Taking a video with your phone is okay with me.

I will have extra fabric in all the colors used for this landscape.

If you have your own design elements you want to add to the landscape, like a lake, then bring blue fabric that has fusible on the wrong side of the fabric. Any fusible product is okay. I use light weight fusibles like Mistyfuse, Lite fuse sold in my website store, and Pellon light fuse products found in most quilt stores.

Lake color: Batik fabrics are best because they are more than one color. 13" x 3" is more than enough fabric if you choose to include a lake in your landscape.
