

International Quilt Festival Houston 2025

Class Title: Texas Bluebonnet

Class Date: Thursday, October 9, 2025, 2-5 PM (3-hr)

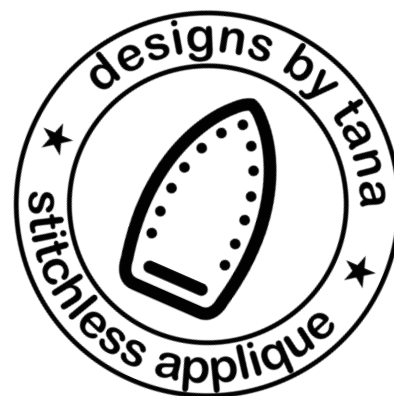

Instructor: Tana Mueller

Supply List: Students must have a rechargeable light pad.

Electricity is not provided for this class.

If your lightbox is able, you can use a portable power bank.

All other class supplies are included in the class kit.

Note: I do not sell rechargeable lightpad.

Additional information about battery operated rechargeable LED lightpad:

A4 is a common size for documents, letters, and printing. It's slightly larger than the US letter size, which is 8.5 in x 11 in.

The new generation of rechargeable LED light boards can be moved anywhere for up to 5 hours without a power adapter, making it easier to work in classes.

Make sure your light pad is full charged for class.

Why do I need a light pad?

Applique: We use a Bear Thread applique pressing sheet to build the applique motifs on for the project. This is done on the light pad. The light pad will be used the entire class.

DO NOT bring a LED light pad with mini dots in the lighted work area. These dots make it difficult to see the black and white class pattern under the Bear Thread applique pressing sheet.

No sharing is allowed.
