**Piecing Improvisational Curves** – 6-hr class

If every straight line is identical, every free curve might be considered unique. What curves do you naturally cut? Let's explore the range, depth and complexity of curves, and learn to piece them beautifully so your work will press perfectly flat.

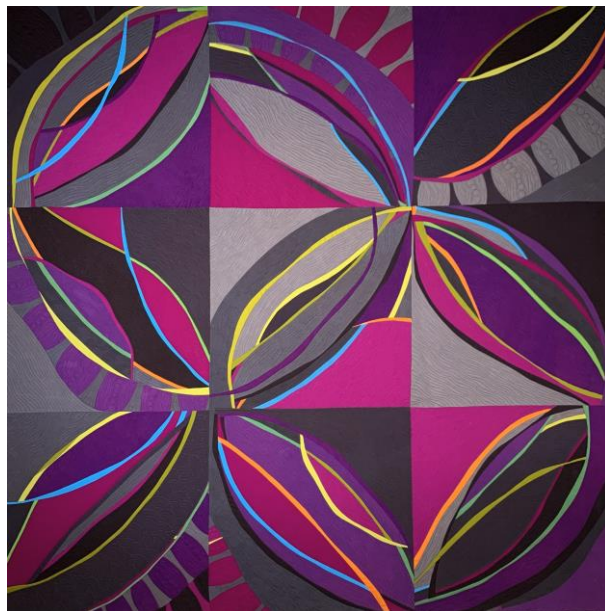

**Supply List**

Basic sewing supplies, including pins & fabric scissors  
Rotary cutting supplies (mat, cutter with new blade) medium sized  
Fabric marking pens/pencils (chalk, Frixion, your favorites)  
Thread: cotton (neutral to your fabric)

Personal Iron and board are not allowed in class.

Sewing machines will be provided for use in class, equipped with a new sharp needle (not universal). We will use only a straight stitch, but “hands free” (knee lift or hover) and engaged even feed features are helpful.

Fabric: 10 or more quarter-yards to half-yards of solid-colored fabric in a range of hues and

values; nothing too dear so you feel free to experiment.
